

**2011 NISSAN
JUKE**

Nissan JUKE™ SL shown in Glacier Pearl.

A white Nissan Juke is shown from a low front-quarter angle, parked on a dark surface. In the background, a city skyline is visible at night, and a large, green, textured sphere resembling a giant bubble or a stylized head is positioned behind the car. The text is in the upper right corner.

IT'S A WHOLE NEW WAY TO MOVE.

Take it to the streets. In JUKE.™ Small, with a big bite, it defies definition. No matter what, the intentions are clear. Ride high, stand out, and move quickly. All while customizing your ride on the go. A turbocharged engine delivers serious boost when you need it and sips fuel when you don't, while an innovative All-Wheel Drive system turns power into grip. Everything you thought a car was just got turned on its head. JUKE.™ It's a whole new way to move through the world. And you're invited.

LATE NIGHT TO EARLY LIGHT.
MY FINEST HOURS.

Nissan JUKE™ SL shown in Gun Metallic.

THE NEXT CURVE.

ANOTHER REASON
TO KEEP MOVING.

Nissan JUKE™ SL shown in Sapphire Blue Onyx.

NEW WORLD.
YOUR JUKE.™

A high-angle, close-up photograph of the front interior of a car. The focus is on the driver's side seat, which is upholstered in black leather with prominent red stitching along the seams and edges. The seat is positioned at an angle, showing its side profile. In the background, the passenger side seat and the center console are partially visible. The door panel on the right side of the frame features a red interior door handle. A circular speaker with a mesh grille is visible on the left side of the image. The overall lighting is dramatic, highlighting the textures of the leather and the contrast of the red accents.

WE LOOK AT THINGS DIFFERENTLY.

NOW YOU CAN TOO.

The next few pages will help fill you in on what it's like to have a JUKE™ in your life. Need to tackle some mountain curves? Hit the Sport mode button on the innovative Integrated Control (I-CON) system. Lumbering semi ahead? Pass it in seconds with the Direct Injection Gasoline (DIG™) turbo engine. Looking to make a big first impression? With a one-of-a-kind interior that melds car and motorcycle into one, that's a given. As you get to know JUKE™ a little better, we hope you find what you're looking for – plus a few surprises.

Nissan JUKE™ SL shown in Black/Red Leather with Navigation Package.

ADAPT AT WILL.

Looking for a shot of adrenaline? With a touch of a button, you'll feel every bit of G-force on the display. Or maybe it's another day in morning traffic. Dial in the right setting and you can dodge the pump a little longer. You decide. JUKE™ obeys.

Shown in
D-Mode Interface

Torque It. Boost It. Save It. – In JUKE™ it's up to you. Drive in Normal mode for the best combination of performance and efficiency. Want to up the ante? Lock in Sport mode and steering feel, transmission gearing and throttle quickly adjust to make every curve count. And when it's time to slow things down, hit the Eco mode button and get the most out of every drop of fuel.

Shown in
Climate Interface

Double Agent – I-CON puts you in charge of your ride style and interior comfort. In D-Mode, the system gives you the ability to rapidly adapt to changing driving conditions. With a push of the Climate button, the I-CON system switches displays and now becomes your control centre for all things comfort.

Get the Stats – Count on the drive computer to keep you in the know. Loaded with useful information about everything from maximum G-force to total trip kilometres to your daily fuel economy record. In JUKE,[™] the more you know, the better you drive.

MOVE ON COMMAND.

Sometimes you just get stuck behind the wrong people. Passing lane ahead! Tap into the turbo and leave them in the rearview mirror. And when it's time to get a grip, count on JUKE™'s torque vectoring All-Wheel Drive system to make sure all that power gets to the pavement.

1.6-L Direct Injection Gasoline
(DIG™) Turbo Engine

1.6-L Direct Injection Gasoline (DIG™) Turbo – If you could design an engine to provide the ideal balance of efficiency and power, this would be it. Turbo boost gives you more than enough passing power when you need it, while the compact engine design and advanced direct injection deliver fuel-sipping economy when you don't.

CVT with Sport Mode – Smooth as butter and fun to drive. Unlike traditional systems, the intelligent Continuously Variable Transmission (CVT) eliminates the need for gear-hunting for a seamless wave of power. In case you miss the feeling of gears, you can engage Sport mode and bring it right back. Of course, a manual transmission is still available for the die-hard enthusiast.

Electric Power Steering – Every little bit helps. Using electric power steering instead of hydraulic power steering cuts down on the amount of power needed from the engine. And that means more kilometres out of every tank. Plus, because it's vehicle-speed-sensitive, it automatically adjusts steering feel based on vehicle speed.

Nissan JUKE™ SL shown in Brilliant Blue.

Torque Vectoring AWD – Taking on a twisty mountain road? Go for it. Need to tackle a sharp highway on-ramp? Done. JUKE™'s innovative AWD gives you the handling response you deserve. Unlike traditional AWD systems that only distribute power front to back, torque vectoring AWD can also adjust power side to side on the rear wheels, so you can count on solid grip through the turn.

AWD Display – A digital readout between the gauges provides real-time AWD feedback for all four corners.

Nissan JUKE™ SL shown in Black/Red Leather with Navigation Package.

¹Factory-installed option. Never program while driving. GPS mapping may not be detailed in all areas or reflect current road regulations. ²Parking aid/convenience feature. Cannot completely eliminate blind spots or warn of moving objects. May not detect every object. Always check surroundings before moving vehicle. Not a substitute for proper backing procedures. Always turn to check what is behind you before backing up. ³Driving is serious business and requires your full attention. Do not operate any devices connected to the USB or auxiliary audio input jack while driving. ⁴Always give your full attention to driving. Avoid operating your

TAKE CONTROL OF THE SITUATION.

Make easy work out of finding that new club. Dial in your favourite artist. Or call ahead, with both hands on the wheel. In JUKE™, your life never misses a beat.

Nissan Navigation System – JUKE™'s advanced navigation system gives you all the tools to make every trip a snap. Turn-by-turn voice guidance makes getting to your destination especially easy.¹

A. RearView Monitor – Need to squeeze into that tight parking spot? No problem. With JUKE™'s available RearView Monitor, you can back up with confidence. The camera helps give you a clear view of what's directly behind you.²

B. Nissan Intelligent Key® – Never fumble with keys again. Just leave the available Nissan Intelligent Key® in your pocket or bag. As you walk up to the vehicle, it senses the key and allows you to unlock the door with a tap of a button on the door handle. Once inside, use the Push Button Ignition to start the engine.

C. Audio Inputs – All your music is just a plug away. JUKE™ features an available USB input that is ideal for an iPod® or playing MP3s off a thumb drive. And in case you have any music you want to play from a different source, there's an auxiliary audio input.^{3,4}

D. Bluetooth® Hands-Free Phone System – Keep up those connections on the move. With standard next-generation Bluetooth® technology on hand, JUKE™ will store your phone's address book so you can use the voice-activation feature to make calls by name.⁵

E. Upgraded Audio – Lock in that playlist and turn up the volume. The optional Rockford Fosgate-powered subwoofer makes every beat hit hard, while the standard MP3 CD player means your entire CD collection can come along for the ride.

TRUST IN YOUR PRACTICAL SIDE.

When another late night gig is in order, JUKE™ stands ready with multiple storage options to make it a success. Add to that plenty of seat configurations, so your crew doesn't have to miss out. Then, drop in a solid lineup of advanced safety features. This is definitely going to be a night to remember.

¹Airbags are only a supplemental restraint system; always wear your seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. Also, in addition to any other requirement of applicable law, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Airbags will only inflate in certain accidents; see your Owner's Manual for more details. Inflated airbags shown for illustration purposes only. Actual airbags deflate after deployment. ²VDC, which should remain on when driving except when freeing the vehicle from mud or snow, cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. Always drive safely.

A. 1017 Litres (35.9 Cubic Feet) – Drop the seats down and load it up. With the rear seats folded flat, you get a cavernous 1017 litres (35.9 cubic feet) of cargo space. Now there's no excuse to not bring everything but the kitchen sink.

B. Clever Storage – Check under the rear cargo area floor and you'll find a secret storage stash. It's just the right size to store all your roadside safety equipment or anything you want to keep out of sight. (FWD models only.)

C. Six Standard Airbags – 6 standard airbags wrap you in safety. Two dual-stage supplemental front airbags equipped with seat belt sensors and an occupant-classification sensor. Supplemental airbags for side-impact protection are built into each front seat. And two roof-mounted curtain side-impact supplemental airbags to help provide head protection for both rows of outboard occupants.¹

Active Head Restraints – Front-seat Active Head Restraints help reduce the chance of whiplash injuries to you and your front passenger by moving up and forward during certain rear-end collisions.

VDC/TCS/ABS – Stay on course with standard Vehicle Dynamic Control (VDC) that senses understeer or oversteer and compensates accordingly.² Get a grip with standard Traction Control System (TCS). It senses when a front wheel starts to slip and reduces engine power or applies front brakes to help restore grip. And maintain control when stopping using JUKE™'s Anti-lock Braking System (ABS).

Specifications

Engine	SV	SL
MR16DDT – 1.6-litre Direct Injection Gasoline (DIG™) DOHC		
16-valve turbocharged 4-cylinder engine		
Horsepower – 188 HP @ 5600 rpm		
Torque – 177 lb-ft @ 2000–5200 rpm

Finance Options. Through Nissan Canada Finance, we offer many attractive purchase and lease programs, all with competitive rates and terms. With our flexible finance options, driving home a new Nissan has never been easier. Consult your local Nissan Dealership for complete details.

No-Nonsense Warranty. Every 2011 Nissan is covered by a 3 year/60,000 km⁵ Comprehensive New Vehicle Warranty, a 5 year/100,000 km⁵ Powertrain Warranty, an 8 year/130,000 km⁵ Emission Control Warranty on selected components, and a 5 year/unlimited km Corrosion Perforation Warranty. As a Nissan owner, you'll also receive a 3 year Roadside Assistance program available to you 24 hours a day.

Added Security Plan. For ultimate peace of mind, consider the Nissan Added Security Plan. It's our commitment to be there for you, and to help you leave your worries behind. Different plans, available for both purchased and leased vehicles, let you tailor the coverage to your driving habits.

Nissan's philosophy toward the environment, "Seeking a symbiosis of people, vehicles and nature," describes our ideal for a sustainable mobile society, now and in the future. We launched the Nissan Green Program with specific objectives to realize this goal, and we are pursuing it energetically.
