We Service Most Makes and Models of Cars, Trucks and Vans.

Gas Savings 101 Quiz

This short quiz is a reminder to all motorists that the number of miles per gallon (mpg) a car gets is directly related to driving behavior and vehicle maintenance.

True or False?

Q1. Properly inflated tires improve gas mileage.

True. When tires are not properly inflated, fuel costs can be as much as three to five cents higher per gallon. Tire pressure should be checked monthly, including the spare.

Q2. Aggressive driving and jackrabbit starts do not affect fuel economy.

False. Aggressive driving and rapid acceleration can reduce gas mileage as much as 33% on the highway and 5% on city streets. When a vehicle is left idling, it wastes gas and gets 0 mpg.

Q3. Speeding has little effect on gas mileage.

False. In speeds above 60 mph, gas mileage usually decreases rapidly. For maximum fuel economy, stay below 60 mph.

Q4. It's no big deal if the gas cap gets lost or cracked.

False. Approximately 17% of vehicles on the road have loose, damaged, or missing gas caps, causing 147 million gallons of gas to vaporize every year.

Q5. Extra weight in the car causes an increase in gas usage.

True. Items that are not needed weigh down the vehicle, causing an increase in gas usage. Empty your trunk, but remember to keep important emergency items, such as a spare tire, flares, and your first-aid kit.
