

THE RANGE ROVER

2010 MODEL YEAR

The new 2010 Range Rover. It stands alone, above all others, as the pinnacle, the ultimate, most capable luxury vehicle. It is enhanced through the evolution of its exterior design and further extends its renowned leadership with the finest interior. It increases its capability and performance, yet again, with two new engines: LR-V8 Supercharged and LR-V8. The most advanced, most powerful, most complete luxury four-wheel drive vehicle is the new 2010 Range Rover.

The latest manifestation of the iconic Range Rover design. New exterior details emphasize the iconic styling with a new front grille and new headlamps featuring the Range Rover signature 'concentric circle' design. New three-stripped LED indicators announce a theme that continues to the all-LED rear lamps. A purer design for the front bumpers creates a wider, more assured stance which is complemented with a titan silver finish to the front grille and fender vents as well as a unique noble plated finish on Supercharged and Autobiography derivatives. The new 2010 Range Rover with ever more elegance.

The new 2010 Range Rover gives that familiar sense of wellbeing, security and composure as the driver sits in the command driving position. One glance at the instrument cluster reveals the very latest high definition Thin Film Transistor (TFT) LCD technology providing a revolution in the clarity of driver information.

There is the subtlest ambient mood lighting, new steering wheel controls and new clock graphics. A new Surround Camera System gives the driver 5 different views from points around the vehicle. Trailer Assist, a next-generation reversing aid that predicts the rearward trajectory of both vehicle and trailer, is also introduced.

The new 2010 Range Rover. This is the supreme, most capable luxury vehicle off-road. And on-road too. Terrain Response® has been enhanced still further and now works alongside Adaptive Dynamics. The Adaptive Dynamics control system varies damper settings more than 100 times a second to continually optimize ride comfort. It fully utilizes the vehicle's long suspension travel to absorb potholes or ruts and provides greater control at higher speeds and during cornering and braking. The ultimate luxury four-wheel drive vehicle offers reassurance and security in all real-world driving conditions.

The new 2010 Range Rover combines craftsmanship and luxurious interior dimensions that are complemented with an array of advanced technology features. The centerpiece of the fascia is the Touch-screen, an intuitive interface controlling key functions such as the audio entertainment system, the hands-free telephone and the HDD-(Hard Disk Drive) based satellite navigation system. This has been enhanced even further with clearer, more intuitive graphics and is accommodated in a raised center control panel with an improved, stronger, more contemporary design.

The new 2010 Range Rover envelops and cocoons driver and passengers in the finest leather. Autobiography takes the exclusiveness of The Range Rover to a higher level still.

Accompanying the semi-aniline leather seats is full leather covering for the facia, door casings and leather binding on the floor mats. There is now a full leather headlining available for a truly luxurious experience, further refined with the fitment of a **harman/kardon**® LOGIC7® In Car Entertainment system.

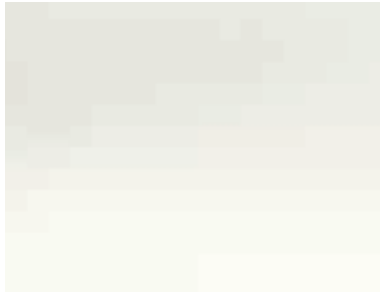

The new 2010 Range Rover engines. In two distinct forms. The LR-V8 Supercharged vehicle reaches unsurpassed levels of refinement and performance with a power output of 510bhp. And the new Naturally Aspirated LR-V8, with all the performance feel of the previous Range Rover Supercharged. The new 2010 all-V8 Range Rover line-up.
